

Report of the Subcommittee on  
Capital Outlay

(Amendments to SB 29  
And SB 30 as Introduced)

Senate Finance Committee  
Virginia General Assembly

February 17, 2008

Mr. Chairman:

This year the majority of the work of your capital outlay subcommittee is reflected in SB 795 – the Six Year Capital Improvement Plan. There are, however, a number of actions that still require approval by the Finance Committee and we recommend them to you in this report. These actions fall into five categories:

1. \$300.0 million in reversions from previously approved general fund projects, which will be refinanced using VPBA bonds, as authorized in SB 795,
2. \$9.5 million of general fund reductions from project funding included in SB 29 and SB 30, as introduced, that will be supplanted by financing provided in SB 795,
3. \$72.0 million general fund in FY 2010 in a central account for maintenance of state buildings,
4. \$22.3 million for general fund supported projects at community colleges, and
5. \$91.8 million for non-general fund supported projects at institutions of higher education.

We are aware that many of you are interested in specific capital projects. With that in mind, a detailed spreadsheet is attached.

Mr. Chairman, we believe that our recommended amendments set out a sound approach for the Commonwealth's capital program. It is our hope it will be your pleasure to adopt them.

Respectfully Submitted,

---

The Honorable Henry L. Marsh III, Chairman

---

The Honorable Charles J. Colgan

---

The Honorable R. Edward Houck

---

The Honorable Kenneth W. Stolle

---

The Honorable Emmett W. Hanger

---

The Honorable John C. Watkins

---

The Honorable Louise L. Lucas

"C-177.10. Planning: Treasury Loans for \$99,830,000

Project Planning

Fund Sources: Bond Proceeds \$99,830,000".

"This item authorizes a treasury loan from the general account in the amount of \$99,830,000 to be repaid when permanent funding is obtained. The loan proceeds will be used for planning costs as detailed below for the projects listed.

Funds authorized by this item shall be used to obtain architectural, engineering, and other services required to provide the items listed below for consideration by the General Assembly when determining whether to fund construction of the projects.

Description of the scope and nature of the project.

Value engineering study that provides recommendations to improve project quality and reduce total project costs.

A life cycle analysis using the Commonwealth's Facility Inventory and Condition Assessment System (FICAS).

For proposed renovations, a facility condition assessment of the existing structure to determine its condition and the appropriateness of its use by the agency or institution. This assessment shall set out appropriate options for renovation or replacement.

Final working drawings and a detailed cost estimate. The cost estimate should consider inflation and include expenses by fiscal year. The estimate should also include equipment to furnish the facility.

The proposed construction method such as design-bid-build, construction management at risk, or design-build, including an analysis on the respective advantages and disadvantages of the use of each method. The proposed construction method should be considered when developing the cost estimate.

7. For any project which does not secure permanent financing within 3 years from the issuance of the treasury loan, the Governor shall recommend an appropriation

from the General Fund for repayment of the treasury loan in his budget recommendations.

B. The appropriations contained in this item for project planning shall be used as specified above and construction funding for the projects shall be considered by the General Assembly after reviewing the information listed above and determining that (1) the project cost is reasonable; (2) the project remains a highly-ranked capital priority for the Commonwealth; and (3) the project is fully justified from a space and programmatic perspective.
